

EMAAN KHAN

Los Angeles, CA | (303)550-2756 | efkhan@usc.edu | www.linkedin.com/in/emaankhan- | [Website](#) |

As a senior at USC, I am passionate about solving real-world challenges at the intersection of human behavior, ethics, and AI. With my experiences in global internships, product development, global & local AI policies, and proficiency in AI, I bring a unique blend of ethical expertise, product development, & technical comprehension. This allows me to effectively innovate and collaborate with cross-functional teams to deliver impactful product solutions. I am excited and committed to applying my skills to drive meaningful change.

EDUCATION

University of Southern California (USC) | 3.65

Cognitive Science, USC Dornsife College of Letters, Arts and Sciences

Artificial Intelligence Applications, Viterbi School of Engineering

Disruptive Innovation, [USC's Iovine and Young Academy](#)

Los Angeles, CA

Expected May 2026

Honors

- University of Southern California Leadership Scholarship Award
- Dean's List Recipient

May 2022-Present

2022-Present

EXPERIENCE

Product Management Intern at Nauto

Sunnyvale, CA | June 2025-Aug 2025

- Led an AI product initiative—gaining firsthand experience in how cross-functional teams translate ideas into products in a fast-paced AI startup environment.
- Collaborated with the Engineering(Perception) team, delivered features that advanced their initiatives that advanced their initiatives and developed user stories that guided product development.
- Built a custom Mixpanel dashboard to surface insights in SaaS and fleet management analytics to improve product for our users
- Drafted product feature specifications in Confluence and managed Jira epics to drive product development across teams

Internship with Umea University's AI Policy Lab

Umea, Sweden | June 2024-Sept 2024

Multidisciplinary collaboration on new theories and methods for human-adapted interaction and human-AI collaboration.

- Co-authoring a thought-leading paper on the intersection of AI and human values and exploring its transformative impact on socio-technical systems
- Delivering actionable insights to key stake-holders on net-zero town design strategies through design -framework for analyzing data and results from simulations of climate-friendly towns

Hierarchy, Networks, & Technology (HiNT) Lab

USC | October 2023-Present

- Building a strategic AI use case library to drive impactful and efficient AI adoption (Gen AI) that deliver solutions to all industries
- Conducted in-depth research utilizing Natural Language Processing (NLP) methods to analyze and understand conversational flow

Supervised Program For Alignment Research (SPAR) *Formal Foundations for AI Policy*

October 2023-Dec 2023

Worked in close collaboration with [Virginia Dignum](#) a leading AI expert in UN and EU councils.

- Developed a thorough process in close collaboration with a global team to understand the impact/risk on not being aligned with the EU AI Act for global software/AI companies

Internship with CU Boulder's Brain, AI, and Child Lab

Seoul, Korea | May 2023-July 2023

Impact of AI on brain activation using brain imaging tools - functional near-infrared spectroscopy (fNIRS).

- Led project on measuring the changes in brain activation while reading scenarios involving children using AI applications
- Analyzed cultural differences in empathy and laid the foundation for further research to influence tools in AI applications
- Collaborated with non-native English speakers to modify scenarios to be relevant to Korean language and culture.
- Developed and led fNIRS workshops to train 50 graduate psychology - computer science students. Resulted in all students receiving a certificate of mastery of fNIRS

ACTIVITIES

SHIFT SC, Ethical Technology Club

USC | January 2023-Present

Executive Board Member, Team Leader of Tech and Public Policy Initiative

- Founded the club's AI and Public Policy Initiative, responsible for outlining goals and leading a team and directing productivity
- Provided recommendations on Minnesota State's AI Policy and its effect on children
- Collaborated with professors to analyze the ethical dilemmas in AI in their educational modules and recommended changes to their curriculum
- Designed an educational module on AI and Public Policy by examining and evaluating current government and company technology policies. Lectured on this topic in multiple USC classes to over 40 students across different disciplines

ADDITIONAL INFORMATION

Technical Skills: Data Analytics (SQL Workbench, MongoDB, Tableau, Neo4j, R Studio, MixPanel), Python(ML), Microsoft Tools, Pitchbook, HTML, Adobe, Figma, Go(Neural Networks)

Other Involvements: AI Safety, Teach for LA (Peer tutoring), SCOutfitters, Concert's Committee, Intramural Basketball, Lifeguarding

Languages: Conversational Hindi and French
